

Application No. 09/928,332

- 5 -

April 19, 2006

REMARKS

The applicant has considered the Examiner's rejection of the claims under 35 U.S.C. 101.

The applicant has amended the main claims to recite, *inter alia*, that the output channel selection is routed *in the format of an internet protocol*. This amendment is supported by the disclosure at page 5, lines 4 to 8 and page 25, lines 1 to 7.

The applicant respectfully submits that the claims so amended are distinguishable from those in parent patent no. 6,038,425, and thus no longer cover identical subject matter that would support a statutory double patenting objection.

The amendments to the main claims further eliminate the reference to a "redistributor" (although the functional elements of the distributor are still claimed), and the output signal being transmitted over a twisted pair of a telephone wire which carries a telephone signal, which is not required for novelty (as evidenced by the claims in the parent patent). The subclaims have been amended consistent with the amendments to the main claims.

Favourable reconsideration and allowance of this application are respectfully requested.

A Petition for an Extension of Time requesting an extension of three months for filing the subject response is enclosed. The Commissioner is authorized to charge any deficiency or credit any overpayment in the fees for same to our Deposit Account No. 500663. A signed copy of this page is enclosed if required for this purpose.

Executed at Toronto, Ontario, Canada, on April 19, 2006.
